

Did you know that the Twin Oaks Landfill also recycles GREEN waste?

If you've ever done yard work or maybe had a tree cut down, odds are it ended up in the Twin Oaks Landfill's brush pile.

The Twin Oaks Landfill accepts all types of green waste as long as it's free of trash or any metal debris that could interfere with the grinding process.

You can dump your green waste in the brush pile for the standard tipping fee.

Reminder: if you're hauling brush to the landfill, please cover your load with a tarp or a net!

You're probably wondering what happens to all the mulch from the brush pile.

Well, two things!

One: we sell it! Mulch can be purchased in bags or bulk from the Twin Oaks Landfill.

Anything we don't sell is used for erosion control.

The mulch helps us stabilize the soil in the landfill cell and protect the groundwater from leachate contamination.

The Twin Oaks Landfill is just that... a landfill.

But if we see an opportunity to recycle or repurpose something, that's exactly what we will do.
