

Did you know... the Twin Oaks Landfill has a team member whose role is to keep you safe?

When it comes to hierarchy on the working face, spotter is king!

Spotters take on the very important job of directing and maintaining a consistent flow of traffic, and keeping drivers and landfill employees safe.

After you untarp, wait at the stop sign until the spotter tells you it's your turn. They will wave you over and direct you to the exact spot where you'll dump your load.

Our spotters always wear high visibility clothing so you can see them as you're coming and going.

The spotters are in constant communication with our compactor operators, ensuring drivers have a clear path to back into.

If you're on the working face, please pay attention and follow instructions. Our spotters are there to keep everyone safe.
